

MiniML

Wolfgang Naraschewski and Tobias Nipkow

March 17, 2025

Abstract

This theory defines the type inference rules and the type inference algorithm W for MiniML (simply-typed lambda terms with `let`) due to Milner. It proves the soundness and completeness of W w.r.t. the rules.

A report describing the theory is found in [1] and [2].

1 Universal error monad

```
theory Maybe
imports Main
begin
```

definition

```
option_bind :: "[ 'a option, 'a => 'b option ] => 'b option" where
